Seamless Access to Global Trading Opportunities | [www.zfx.com](http://www.zfx.com)

# Seamless Access To Global Trading Opportunities

Zeal group of companies (collectively Zeal Group) is a business portfolio comprising regulated financial institutions (trading as ZFX) and fintech companies specializing in multi-asset liquidity solutions in regulated markets backed by proprietary technology, with a presence in all major global locations.

Founded by a group of veteran traders with decades-long experience in the industry, who not only share appreciation for the complexity the world of financial trading itself may present, but also have the expertise and commitment to change the industry for the better, ZFX has set its goal to deliver the next level of multi-asset trading services to retail and institutional investors alike.

# ZFX Product Guide

For the convenience of our customers, this guide provides an overview of contract specifications.

# Precious Metals

Precious metals is a term for the classification of metals that are considered to be rare and/or have a high economic value. The higher relative values of these metals are driven by various factors including their rarity, uses in industrial processes and as investment vehicles. The most popular precious metals with investors are gold and silver.

## Trading Conditions Guide

### 1. Pips

A pip is the smallest price change that any currency or financial instrument can make. For most currency pairs, it is equal to a 0.0001 price change in the quote currency. In currencies with low unit price, a pip can represent 0.01 units, one notable example being the Japanese Yen. Gold 0.1 Oil 0.01

### 2. Transaction sizes

ZFX offers flexible transaction sizes throughout all its trading platforms. In addition, whenever the markets are open, our trading desk is available to assist you in placing orders, including transaction sizes greater than the ones stated in the conditions tables above.

### 3. Trading Hours

ZFX platform operates according to London time, starting from 22:05 Sunday to 24:00 Friday.

Our customer support are open 24/7, available for you by telephone, online and via email.

### 4. Expiry Date

ZFX's CN300, WTI and Brent oil are futures-based CFD, and as such have monthly expiries. The expiry of the CFD contract is intentionally several days before the respective futures contract to avoid expiry-related price volatility. Upon expiry, all trades and orders for the expiring CFD will be closed. Expiring contracts will be cash settled at the ZFX closing rate. When trading resumes post-expiry, ZFX price will then be based on the next-nearest expiring futures contract price.

# Trading Conditions Guide

## 5. Overnight Funding

Overnight Funding, swap rate or rollover is defined as the overnight interest added or deducted for holding a position open overnight. Overnight Funding are determined by the overnight interest rate differential between the two currencies involved in the pair and whether the position is long or short.

### Example 1:

EURUSD Short/Long Swap Rate:  
2.74/-6.03  
Position:  
Sell 2 lots of EURUSD  
Actual Swap Rate per Day:  
2.74x2 = You Receive 5.48USD per Day

Position	Negative Swap	Positive Swap
Buy/Long	You Pay	You Receive
Sell/Short	You Pay	You Receive

### Example 2:

USDCNH Short/Long Swap Rate:  
30.03/-74.2  
Position:  
Buy 1 lot of USDCNH  
Actual Swap Rate per Day:  
-74.2x1 = You Pay 74.2CNH per Day

When convert to USD  
(If USDCNH exchange rate: 7.00)  
Actual Swap Rate in USD:  
-74.2/7= You Pay 10.6USD per Day

- Actual Swap Rate please refer to MT4 Contract Specification
- 3-days Swap applies on Wednesday to account for weekend rollovers

## 6. Leverage

When you trade FX and Gold products on a ZFX Mini Trading Account, you may use up to 1:2000 leverage depending on your trading account equity. For STP and ECN account, we offer up to 1:500 leverage.

### Example :

A Mini Account trader has balance of 2500USD, and floating P/L is 600USD, hence the equity of the trading account = 3100USD. As the equity is more than 3000USD, our system will automatically reduce the leverage from 1:2000 to 1:1000.

Therefore, if the trader wants to open a position of Sell 1 lot of EURUSD (1.127/1.128), the required margin will be:  
 $(1.127 \times 100000 \times 1) / 1000 = 112.7 \text{ USD}$

If the trader decided not to trade at the moment, and the floating P/L reduced to 300USD, hence the equity become 2800USD. As the equity is less than 3000USD now, our system will automatically raise the leverage from 1:1000 to 1:2000.

Therefore, if the trader wants to open the same position now, the required margin will be:  
 $(1.127 \times 100000 \times 1) / 2000 = 56.35 \text{ USD}$

For risk management purpose, our system will automatically reduce your applicable maximum leverage if any increases in your trading account equity trigger the system to do so. Your existing trades will be affected by this change. Please refer to the leverage tiers below for more information

### Only Applied for Mini Account

Trading Account Equity (USD)	Trading Account Equity (USD)
0-3,000	1 : 2000
>3,000-10,000	1 : 1000
>10,000-20,000	1 : 888
>20,000-50,000	1 : 600
>50,000-100,000	1 : 400
>100,000-200,000	1 : 200
>200,000	1 : 100

## Trading Conditions Guide

### 7. Stop Out Level

A stop out level is a specific point at which all of a trader's active positions in the foreign exchange market are closed automatically by their broker, because of a decrease in their margin levels, meaning that they can no longer support the open positions.

#### Stop Out Level Example:

Stop Out Level = Equity/Margin

Trader A is trading with ZFX STP Account:

Current Equity : 300USD

Margin Used : 600USD

Margin Level = 50%

Since ZFX STP account's stop out level is 30%, therefore, the current position will not be closed automatically

Later, Trader A's Account equity drops

Current Equity : 180USD

Margin Used : 600USD

Margin Level : 30%

Since the Margin Level has reduced to 30%, and trigger the stop out level for STP account, the current position will be closed automatically to release the margin.

#### Stop out level:

**Mini Account – 20%**

**STP Account – 30%**

**ECN Account – 50%**

### 8. Dividend

A dividend is the distribution of a portion of the company's earnings, decided and managed by the company's board of directors, and paid to a class of its shareholders.

Dividends are payments made by publicly-listed companies as a reward to investors for putting their money into the venture.

All dividend are subject to our announcement, generally accompanied by a proportional increase or decrease in a company's stock price.

#### Dividend payment received when holding a long position:

Dividend Payment = Component Dividend (weighted, per stock index contract) × Position Size in Standard Lot × Contract Size per Standard Lot Currency Multiplier

#### Dividend charge deducted when holding a short position:

Dividend Charge = Component Dividend (weighted, per stock index contract) × Position Size in Standard Lot × Contract Size per Standard Lot Currency Multiplier

Position	Dividend
Sell/Short	You Pay
Buy/Long	You Receive

#### Example:

On 6th July 2020, HK50 dividend is \$9.149HKD

If Trader A has bought 3 lots of HK50 on 5th July and holding the position till 7th July, Trader A will receive dividend payment.

HK50 contract size: 50

Dividend: 9.149HKD

Dividend payment: 9.149 × 50 × 3 lots = 1372.35HKD

When convert to USD (If USDHKD Exchange Rate = 7.75)  
1372.35/7.75 = 177.07USD

Trader A will receive 177.07USD as dividend payment
